Data Science & ML Practitioner | Predictive Modeling, Computer Vision & Forecasting | Built AI Recognition Systems | Python | Insight Engineering

Marpalli, Telangana, India

Summary

I am an aspiring Data Scientist with a strong foundation in Computer Science, driven by the belief that meaningful insights emerge when data meets curiosity, analytical thinking, and real-world problem solving. I focus on transforming complex datasets into actionable intelligence and building predictive solutions that create measurable impact.

My journey into data science is rooted in hands-on experimentation and project-based learning. I have developed forecasting models to analyze real-world scenarios, worked on text recognition and handwriting analysis using machine learning techniques, and created data visualization dashboards using Power BI to communicate insights clearly. Through these experiences, I have strengthened my skills in machine learning, data analytics, predictive modeling, and problem-solving while continuously exploring new tools and methodologies.

I am particularly interested in predictive analytics, intelligent automation, and data-driven decision-making systems that bridge the gap between theory and practical application. I approach challenges with curiosity, resilience, and a strong commitment to continuous improvement.

Currently, I am focused on expanding my expertise in advanced analytics, real-world data applications, and scalable AI solutions while collaborating with professionals and contributing to impactful projects.

Thank you for taking the time to visit my profile. I appreciate the opportunity to connect, learn, and collaborate with individuals and organizations passionate about innovation, data science, and building meaningful technology.

Experience

Forage Tata
Data Specialist

Completed a data analysis internship with practical projects. Gained experience in handling datasets. Used Excel and Power-Bi to create reports.

UptoSkills
Data Mining Analyst
May 2026 - Present (1 month)

Colosseum CQ Solutions Pvt. Ltd
3 months

Image Specialist
March 2026 - Present (3 months)

Quality-checked 1,000+ annotated images for ML pipelines, maintaining data accuracy above 95%.

AI_Image_annotation
March 2026 - March 2026 (1 month)
Hyderabad

AICTE VOIS
Data Analyst
September 2025 - October 2025 (2 months)

Completed two projects in period of time. Gained experience in data visualization. Used Google Colab to perform data cleaning and visualization.

Education

Pallavi Engineering College
Bachelor of Computer Science · (September 2023)

Gowtham model school
High School Diploma

Gowtham model school
SSC Board

Pallavi Engineering College

Bachelor of Technology, Computational Science

Sri Chaitanya College of Education

TSBIE
